

## Issues in the Gulf.

### Hurricane Katrina

... Many organizations and individuals have been devastated by Katrina. Many have been restored to their home and nearly normal lives. However, as of the date of this posting, the vast majority of those displaced due to flooding have little hope of being restored any time soon. North Carolina Baptist Men and other religious, para-religious, and other groups have been providing a constant flow of volunteers and materials to try to close the gap. Public awareness needs to remain high in order to keep the flow of volunteers and donations running. Numerous new organization have been spawned on the aftermath of Katrina. Their efforts, however, are not limited to the gulf region. But we all need to remember the gulf coast and the need to continue efforts on a large scale there.
